

Information for VR & 360° service providers

360 Degree Service Database & Commission brokerage

New 360° camera systems are launched every month. So far the representation took place in partial excerpts by PC, Tablet, Smartphone or VR glasses. Flat screens (PC, Tablet, Smartphone) can take 360° pictures only conditionally represent. VR-glasses let the wearer deep into the 360-degree world, but everyone else has to stay "outside".

With the cylindrical projection, the 360Mini closes this gap and makes 360° views accessible to all viewers without VR glasses. The 360Mini is the world's first 360° full-screen projector. Our display technology supports all 360° recording systems.

We mediate free of charge
